SOME OF THE ADVANTAGES OF BUYING FROM

Plumfield Nurseries . . .

Years of experience in growing Nursery Stock and solving many of your planning problems. A large organization of trained help. Twelve of our employees have a total of 360 years' experience. Improved modern warehouse, ventilated and temperatures controlled, keeping stock in healthy growing condition. Modern equipment enables us to grow Nursery Stock that gives satisfaction to the most particular buyer. Our stock grown at Fremont, Nebraska, in clean, cultivated fields under ideal climatic conditions for replanting. A new Certificate of Inspection from State Inspector each year. Stock handled with the least possible exposure assuring high survival results. Low prices for fine quality guaranteed Nursery Stock.

HOW TO ORDER

Please name second choice. In case we are out of variety or grade wanted, this will help us to make prompt shipment.

PLEASE STATE HOW TO SHIP EXPRESS or FREIGHT CHARGES COLLECT

If mail shipment is desired, add 10% to order unless order is under \$2.00, then add 20c to cover special packing and postage.

Trees over 3 to 4 feet high must travel by Express, Truck or Freight.

Our NURSERY STOCK is grown on the best land in the Platte and Elkhorn valleys. We use modern machinery; have modern FROST-PROOF STORAGE, and life-long TRAINED HELP. Our office and packing grounds are located one block south of U. S. Highway No. 30, on Nye Avenue.

We extend you a personal invitation to visit our NURSERIES AND STORAGES at any time of the year.

OUR GUARANTEE

Our NURSERY STOCK is guaranteed to reach you in a healthy, growing condition. Stock that fails to show growth will be replaced, if notified by July 1st following delivery. After this date, we will replace at one-half the current price, if notified by October 1st, following delivery, F. O. B. our packing grounds.

Replacements will be made of same size as originally bought. Planting service at cost.

SHORTAGES OR COMPLAINTS MUST BE REPORTED AT ONCE

If any NURSERY STOCK proves untrue to description, we hold ourselves in readiness, on proper proof, to replace it or refund the amount paid, but we shall, in no case be liable for any sum greater than the amount originally received for said NURSERY STOCK.

EARLY BEARING DWARF APPLE and PEAR TREES

Dwarf growing, young bearing fruit trees, are not new; they have been successfully grown in Europe for 200 years and in Eastern United States for 75 years. Are becoming more popular every year. They have many advantages in the small yard and garden, bear young, require less space, can be sprayed and pruned easily. The quality of the fruit is as good or better than fruit grown on standard stocks, and can be harvested without the use of tall ladders.

NEW VARIETIES

DELICIOUS CRAB

This Crab Apple was found on the Henry Lass farm near Scribner, Nebraska. Mr. Lass planted a Delicious apple seed and obtained a Crab apple with Delicious aroma and flavor. This should be tops in a preserving and pickling Crab. We are offering these for the first time. Fruit is large, is greenish yellow with a red stripe and creamy white meat, solid flesh.

PACAL CRAB

Another one of the Mr. John Pacal seedlings. Fruit brilliant red and of good size for a Crab apple. Flesh very solid. This is a good jelly and pickling Crab and we think it is worthy of space where Crab apples are desired. Bears abundantly. Orchardists who have seen these Pacal trees are very enthused with them.

PACAL SUMMER DELICIOUS

A new variety offered for the first time. Parent tree at Weston, Nebraska. Grown from a seed planted by Mr. John Pacal. This tree bore crops for the past several years, having survived the fall freeze of 1940, proving its hardiness. Apples of large size, red, slightly striped, very delicious flavor and aroma of the Delicious. Ripens in September. Bears quite young. Truly a fine apple.

ALMATA

A newer discovery of Professor Hansen's College of Agriculture, Brookings, South Dakota. A truly brilliant solid red flesh apple. Desirable for sauce or pickling. Size 2 1/2 to 3 inches, red peeling and red flesh. Tart flavor. Bears young and prolific.

Plumfield EVERGREENS

SPECIMEN STOCK

We offer one of the finest assortments of Evergreens in the West. They are all transplanted from time to time, to develop the required root system and pruned to give them shape. We invite you to visit our fields and tag out your selection of Evergreens. We have thousands of Evergreens from which to make your selection.

NOTE—Evergreens are dug with ball of earth and burlapped. They will be shipped by freight or truck unless otherwise instructed. Can not be mailed. The burlap, next to the earth, should be left on when planted. Low and spreading types of Evergreens are measured across.

The most popular and hardy Evergreens in the Middle West are the various types of Junipers. In form they vary from those growing flat on the ground to those growing 80 to 100 feet tall.

Our Evergreens are all hardy varieties and will do well any place in the Mid-West. All new varieties introduced by us have been tested for a number of years and have proven very worthy. We have devoted much time in search of better types to propagate for this territory and are proud to offer the trade such good varieties as listed in this catalog, along with some of the older varieties which have been on the market for a number of years and speak for themselves.

DOUGLAS FIR

DOUGLAS FIR

The Douglas Fir are well known, however, the type listed here differs from the Western type as well as the Northern and Southern types. This one is native of Colorado, stands considerable drought. Foliage is bluish-green, grows 1 to 2 ft. per year, is symmetrical and fairly compact. Makes a nice yard tree, also used extensively for windbreaks.

Smaller Landscape Evergreens dug with bare roots and packed in wet moss priced on page 10.

Why We Grow Grafted Evergreens

JUNIPER MOFFETI

Another wonderful tree selected from the Rocky Mountains of Colorado and is a dandy tree. Foliage sharp, light greenish-silver color, tips of branches are more silver. Habit is upright and pyramidal, branches grow close together making a very dense tree. Grows about 12 inches a year. Can be sheared if desired.

JUNIPER WELCHI

The Welchi is the most satisfactory columnar type Scopulorum on the market today. Foliage is a light, evenly mixed greenish-silver. Leaves sharp but lay very close to the stem. Branches are very full and tufted at the base tapering out to a prominent point, yet they are sharply curved upward forming a fine outstanding columnar tree. Grows about one foot a year. Ultimate height 20 to 25 feet. Can be sheared if necessary.

Evergreens, like other varieties of trees, are being improved and we have devoted a number of years producing trees that are outstanding in color and habit of growth. To obtain these results we graft from trees that we have carefully selected and held under observation long enough to prove their superior qualities. Evergreens are often planted in pairs and in many cases one or more pairs are desired on a landscape planting. If grafted types are planted in pairs or in any amount of the same variety they will always grow and look alike. We can assure you that no finer grafted evergreens are produced than we offer in this catalog. The price of grafted evergreens is slightly higher than common seedling types as the cost of producing them is more.

JUNIPER PATHFINDER

This tree found favor almost instantly by reason of its outstanding silver foliage. It is upright in habit, full at base, limbs curved upward covered with shining silver-blue foliage making it an outstanding tree of the times. Will grow about one foot a year. Ultimate height 20 to 30 feet. You can shear this tree if necessary.

JUNIPER SILVER BEAUTY

A native of the San Isabel Forest region, and truly a beautiful tree. It is upright, full at base, branches have upward trend, foliage is greenish-silver, more silver on the exposed tips of branches. Grows about one foot a year. Ultimate height 20 to 30 feet. Can be sheared if necessary.

JUNIPER SUTHERLAND

This type of evergreen is definitely green in color as compared to the other varieties of Scopulorum. It is bushier in growth habit than the others, and consequently wider at the various given heights, than is the case with other varieties of the same size. Its beauty in our opinion is to allow it to grow in a natural manner, without shearing.

EVERGREENS *Fremont, Nebraska*

What Scopulorum is and Why it is Desirable

In brief, it is commonly known as Western Red Cedar or Silver Cedar and is native of Nebraska west of North Platte to the Rocky Mountains. Its range north is through the Dakotas and Montana and south into New Mexico. This variety thrives where the annual moisture is only six to eight inches a year. It differs from our local Cedar as the foliage runs more to silver color and as a rule is more symmetrical and compact in habit. It played a very important part in furnishing fence posts and logs for cabins for the Pioneers of the Northern Great Plains States. We find it most useful for this part of the country as it has a great ornamental value as well as for windbreak and timber lots. You will note that we have selected some fine specimens for propagation and offering many of them as ornamental trees under Grafted Junipers.

Prices on Grafted Scopulorum Evergreens

4½-5 ft.....	9.50
5-5½ ft.....	11.00
5½-6 ft.....	12.50
6 -7 ft.....	14.00

JUNIPER FUNALIS

This variety has (if possible) proved to be more vigorous than most of the Scopulorums. Whipcord, bluish-green foliage. Straight stem with close set branches. Branches grow nearly horizontal but will retain more compactness if sheared once a year. Grows one foot a year. Ultimate height 20 to 30 feet.

JUNIPER WEIRI

A true blue color foliage. This tree has sharp pointed leaves that are blue throughout. The tree grows upright, limbs semi-horizontal, short, and tufted at the tip. Making a very dense growth, full at base, takes on shape when young and retains its pyramidal habit well throughout the years. Grows about 8 to 12 inches a year. Ultimate height 18 to 25 feet. Can be sheared if necessary.

JUNIPER DECUMBENS

This tree will not display its beauty until it has attained a growth of six feet or more, displaying more beauty each year. It has shining silver-green foliage. Each year the new branches, while soft, grow downward and as the season goes on the branches stiffen and turn directly upward. As the tree develops it becomes a mass of well clothed horizontal branches with their tips perpendicular with the leader.

JUNIPER FULGENS

This tree is a native of Colorado. Its habit is upright, pyramidal, full at base and grows compact. Bicolor foliage, bluish-green becoming more silver at the ends of the branches. The branches grow more or less opposite, forming flat Arbor Vitae like limbs. Will grow about one foot a year. Ultimate height 20 to 30 feet. Can be sheared if necessary.

GLOBE SCOPULORUM

SEEDLING SCOPULORUM

JUNIPER SCOPULORUM, Globe Shape—Compact globose form of Scopulorum Juniper. Silvery foliage very hardy.

TAMARIX JUNIPER

(*Juniperus sabina tamariscifolia*)

A beautiful dwarf. Handsome, light green, lacy foliage resembling the delicacy of the Tamarisk shrub thickly fills the low, creeping plant, forming a dense mat of misty green. You will find it very charming as an edger or in the rock garden.

**SOLD
OUT**

SPREADING JUNIPERS for Foundation and Border Plantings

KOSTER'S JUNIPER (*Juniperus virginiana kosteri*)

Here you will find the same handsome, arching characteristic of the Pfitzer's Juniper, its spreading, graceful stems often 2 to 3 feet in length, and covered with rich foliage of bluish green. Very hardy, fine sort, ideal for the rockery, edging the pool, or bordering the foundation planting.

18-24 in.....	\$4.25
2-2½ ft.....	5.00
2½-3 ft.....	6.00
3-3½ ft.....	7.00

VIRGINIANA ELEGANTISSIMA LEE Gold Tip

Dark green foliage. Golden tipped, more so in autumn. The natural tendency is to grow low and spreading. Very hardy and desirable, where color is required.

15-18 in.....	\$3.50
18-24 in.....	4.25
2-2½ ft.....	5.00

PFITZER'S JUNIPER (*Juniperus chinensis pfitzeriana*)

Exceptionally beautiful, graceful and hardy—no wonder it is one of the most popular. Handsome, feathery, gray-green foliage covers the arching, spreading branches as it develops its broad, picturesque form. Hardy everywhere, and does well in shade as well as sunlight.

15-18 in.....	\$3.50
18-24 in.....	4.25

Prostrate and Creeping Junipers for Ground Cover

JUNIPER ADMIRABILIS

This juniper belongs to a specie found in the Rocky Mountains. Its habit of growth is horizontal but it is so compact that it makes a solid mat of evergreen, covering the ground completely. Foliage bluish green. Grows 6 to 8 inches high. Spreads rapidly, yet retains its compactness. A very fine plant to use for covering graves, terraces or any place where a low beautiful covering is wanted.

12-15 in.....	\$2.50
15-18 in.....	3.00
18-24 in.....	3.50

ANDORRA JUNIPER

A horizontal juniper with grayish-green foliage turning to a reddish purple in early winter. Spreads rapidly, making a fine ground cover eight to ten inches high.

12-15 in.....	\$2.50
15-18 in.....	3.00
18-24 in.....	3.50

The above Junipers are used for terrace, rock garden and grave covering.

JUNIPER FILICINUS MINIMUS

This pretty little juniper is also a variety of the Rocky Mountains. It is one of the finest foliated evergreens of the juniper family. Its short horizontal limbs covered with delicate small branchlets forming fern shaped branches makes it a gem for the rock garden or any other place that a slow growing prostrate evergreen is desired. Grows 4 to 6 inches high, spreads slowly and is very compact. Green foliage.

12-15 in.....	\$2.50
15-18 in.....	3.00
18-24 in.....	3.50

JUNIPER LIVIDUS

This is another fine variety of the Rocky Mountain region. Foliage is bluish-green with a silver cast. Branches more slender but very well furnished and does make a remarkable plant. It grows 4 to 6 inches high and spreads reasonably fast, making it very desirable to use.

12-15 in.....	\$2.50
15-18 in.....	3.00

FIELD PICTURE

Largest and Finest Collection in the Mid-West

PLUMFIELD EVERGREENS

EVERGREENS for Windbreaks . .

Think of them as matured and the protection they afford against the cold and hot winds. They are everlasting. Our Evergreens are dug fresh from the Evergreen beds at planting time and shipped immediately. The crucial time for Evergreens is usually July and August, following spring planting, therefore, they should be well protected, cultivated, mulched with straw, and watered through this period.

Evergreens cannot be packed with other stock, but will be shipped separate. As a rule the frost does not get out as soon.

TRANSPLANTING—These Evergreens have all been transplanted one or more times. The letter "T" following the size indicates the number of times transplanted. Transplanting is done to develop more fibrous roots which start much faster than large heavy tap roots. This class of stock will give you a better percentage of survival than stock not transplanted.

FIRS

SOLID RED DELICIOUS

One of the most used fruits in the world. Can be easily grown, and should be planted extensively. Varieties we are listing are of the best sorts and recommended for this locality. You may make a selection of varieties and obtain quantity prices on Apples.

THESE PRICES APPLY TO ALL VARIETIES OF APPLES AND CRAB APPLES AS LISTED BELOW.

SUMMER VARIETIES

- ANOKA**—July to August. This variety fruits very young. Red and yellow striped.
- DUCHESS**—August. An old variety, but still one of the best. A good cooking apple.
- EARLY HARVEST**—July. The earliest summer apple. Pale yellow fruit.
- EARLY McINTOSH**—Two weeks later than Yellow Transparent. Handsome red color and pleasing taste. Good quality.
- RED DUCHESS**—All red color. Season and quality same as Duchess.
- RED JUNE**—Late July. Medium size, round, deep red fruit.
- YELLOW TRANSPARENT**—July to August. Fruits quite young. Large clear yellow.

FALL VARIETIES

- FAMEUSE or SNOW**—August. Light red fruit; delicious flavor.
- WEALTHY**—Early September. One of the old standard varieties. Bears young and is very hardy.

WINTER VARIETIES

- CORTLAND**—Deep red. Good commercial variety. Comes into bearing young.
- DARK RED JONATHAN**—The new dark red Jonathan. Colors two to three weeks earlier than Jonathan, and a deeper red.
- RED DELICIOUS**—Solid red. One of the most popular apples. Fruit large, flesh white, tender and juicy.
- GRIMES GOLDEN**—Rich golden color. An extra good all-round apple.
- HARALSON**—Solid red. Fruit is of excellent quality, and a good keeper.
- JONATHAN**—Red. The best apple of all. Should be included in every planting.
- PRAIRIE SPY**—Wealthy shape, color red over yellow ground. Ready for use about Christmas. Very good quality and keeper. This apple has great promise.
- NORTHWESTERN GREENING**—Yellowish green. Flesh crisp and juicy. Very hardy.
- STAYMAN WINESAP**—Deep red. Good commercial variety.
- WINESAP**—Crimson. A medium sized apple of fine flavor.
- YELLOW, DELICIOUS**—Golden yellow. Sweet, spicy flavor.

DOLGO

Crab Apples

- DOLGO**—Fiery red. Bears young and abundantly. Tree very ornamental.
- RED SIBERIAN**—Small jelly crab, grows in clusters. Bears young.
- VIRGINIA**—Fruit medium to large, yellow red and of good quality. A strong grower. It produces fruit under the most adverse conditions.
- WHITNEY**—Light yellow striped red. Large fruit.

ITS Fremont, Nebraska

Apricots

Apricots bloom early and many times are caught by frost. Heavy mulching after the ground freezes solid will retard their early blooming.

CHINESE—Yellow. Large fruit, and very hardy.

✓ **MOORPARK**—Orange-yellow. Fruit large, with rich, sweet, flavor.

"**MANCHURIAN APRICOTS**" Professor Hansen's Hybrids, Brookings, South Dakota.

NINGUTA—Large yellow blushed red. Crop very heavy. Hardy.

SANSIN—Very delicious. Hardy. Fruit is large and produces heavy.

SCOUT APRICOT—A Morden Manitoba, Canada production. Bears well. Fruit bronze gold color. Flesh yellow, freestone, tender, free of fibre and thin skinned. Very hardy.

SCOUT APRICOT

7/16 in. caliper, 3-4 ft.....	1.45	1.42	1.38	1.35

Cherries

There is no fruit tree more profitable than the Cherry, especially the sour varieties, which are very desirable for pies and canning. They bear fruit very soon after planting and bring good returns on your investment. Cherries are easily raised, as they are adaptable to almost any kind of soil, and should be planted in large enough quantities to insure plenty of this desirable fruit for the family. You may select varieties and obtain quantity prices.

SOUR CHERRIES

	Each	Lots of 4 each	Lots of 8 each	Lots of 12 each

EARLY RICHMOND—Bright red. Earliest, and a good pie cherry.

ENGLISH MORELLO—Blackish red when fully ripe. Tart, but very rich for canning.

MONTMORENCY—Large, red. The best all-purpose cherry.

OSTHEIM—Black when ripe. Red meat inside.

SWEET CHERRIES

We are listing only the Yellow Glass as this is the only variety of Sweet Cherry that is a dependable yielder in this climate.

YELLOW GLASS—Golden yellow. A hardy and productive sweet cherry

Prices 20c per tree higher than sour cherries.

MONTMORENCY

Pears

BARTLETT (Summer)—Golden yellow, red cheek. Excellent flavor.

CLAPP'S FAVORITE (Summer)—Large pear. Excellent quality, smooth flesh Hardy and bears young.

DOUGLAS (Winter)—The best winter pear. Hardy. Bears young and productive.

DUCHESS (Autumn)—Large greenish yellow. Flesh white. Excellent flavor. Hardy and productive.

FLEMISH BEAUTY (Autumn)—Large, beautiful, excellent quality, juicy. Hardy and productive.

SECKEL (Summer)—Small sugary fruit. Splendid for home use.

MINNESOTA HYBRIDS

GOLDEN ROD—August. Large, yellow. Very hardy and productive. Good quality.

MONITOR—August. Large. Red, very hardy and productive. High quality.

UNDERWOOD—August. Large, rich red, rather oval and juicy. One of the best.

GOLDEN EMBER—August and September. Good canning. Large rich golden yellow. Good keeper. Very hardy and productive.

SUPERIOR—Ripens over a long period. Large red fruit, yellow flesh, juicy and sweet. We recommend this variety.

NATIVE VARIETIES

OMAHA—August. Large, red and sweet. Productive and valuable.

HANSEN HYBRIDS

COMPASS—August. Cherry-Plum. Small fruit, dark red when ripe.

HANSKA—August. Large red, apricot flavor. Very good quality.

KAHINTA—August. Large red, yellow flesh. Very productive. Good quality.

OPATA—July. Medium size. Fruit purplish-red, with green flesh.

SAPA—July. Medium size. Fruit purple with red flesh. Juicy and very good.

TOKA—August. Large, red and very desirable. Similar to Hanska.

WANETA—August. Large, red and very productive.

**We Solicit Your Inquiries
for Varieties Not Listed.**

Peaches

Next to Apples, Peaches are used for more purposes than most other fruits. Peaches picked from your own orchard are the finest flavored and best. One crop of fruit pays the grower many, many times the original cost of the trees. Peach can be profitably used as fillers in Apple orchards. We carry a long list of varieties and are listing only a few of the most popular.

	Each	Lots of 4 each	Lots of 8 each	Lots of 12 each

HIGH BUSH CRANBERRY

SNOWBALL—

SPIREA ARGUTA (Garland Spirea)—Upright growing shrub. Covered with small white flowers in early spring, before the leaves appear.

12-18 in.....	\$0.40	18-24 in.....	\$0.50
2-3 ft. heavy65

SPIREA BILLARDI (Billard's Spirea)—Long feathery plumes of dainty pink. Blooms in mid-summer.

18-24 in.....	\$0.50	2-3 ft.....	\$0.65
3-4 ft. heavy80

SPIREA FROEBELI (Froebel's Spirea)—Dwarf, vigorous grower. Young foliage tinged red, flowers rose color.

12-18 in.....	\$0.45	18-24 in.....	\$0.60
2-3 ft. heavy75

SPIREA MULTIFLORA—Very early flowering shrub. Bright green foliage. Leaves short and narrow. Grows well in both shady and sunny places. Makes a fine hedge or foundation planting. Flowers white.

18-24 in.....	\$0.50	2-3 ft.....	\$0.65
3-4 ft. heavy80

SPIREA THUNBERGI—Graceful early flowering shrub. Pure white flowers, bright green feathery foliage.

12-18 in.....	\$0.40	18-24 in.....	\$0.50
2-3 ft. heavy65

SPIREA VANHOUTTE—The most popular of all the Spireas. Arching branches covered with white blossoms in spring.

12-18 in.....	\$0.25	2-3 ft.....	\$0.45
18-24 in.....	.35	3-4 ft. heavy60

SYMPHORICARPUS RACEMOSUS (White Snowberry)—Pink flowers in mid-summer, followed by large berries of snow white color.

12-18 in.....	\$0.35	18-24 in.....	\$0.45
2-3 ft. heavy60

SYMPHORICARPUS VULGARIS or CORALBERRY (Red Snowberry)—Dwarf native shrub. Loaded with red berries that remain on the branches all winter.

12-18 in.....	\$0.35	18-24 in.....	\$0.45
2-3 ft. heavy60

VIBURNUM OPULUS (Cranberry Bush)—Single white flowers in spring, followed by red berries that hang on almost all winter.

12-18 in.....	\$0.50	18-24 in.....	\$0.65
2-3 ft. heavy75

VIBURNUM OPULUS STERILIS (Snowberry)—One of the best loved of spring flowering shrubs. Large ball-like clusters of flowers. Does not produce fruits or seeds.

12-18 in.....	\$0.50	18-24 in.....	\$0.65
2-3 ft. heavy75

TAMARIX HISPIDA (Kashagar Tamarix)—Soft, feathery silver foliage. Bright pink flowers freely produced.

18-24 in.....	\$0.50	2-3 ft.....	\$0.65
3-4 ft. heavy75

TAMARIX INDICA (Green Tamarix)—Upright growing shrub, dull green foliage. Pink flowers.

18-24 in.....	\$0.50	2-3 ft.....	\$0.65
3-4 ft. heavy75

WEIGELA EVA RATHKE (Red Flowering Weigela)—Red flowers produced freely in early summer. Does well in shade.

18-24 in.....	\$0.75	2-3 ft.....	\$1.00
---------------	--------	-------------	--------

WEIGELA ROSEA (Pink Weigela)—Produces a mass of brilliant pink flowers in early spring.

18-24 in.....	\$0.50	2-3 ft.....	\$0.75
---------------	--------	-------------	--------

HEDGING

This is a lighter grade of stock than our standard grades but it is young, healthy stock and will do well.

PRIVET, ARMUR RIVER—These are used almost exclusively for hedges.

	Per 10	Per 25	Per 100
12-18 inch light	\$1.50	\$3.00	\$11.00
12-18 inch heavy	1.75	3.35	13.00
18-24 inch	2.00	4.00	15.00

BARBERRY, THUNBERGI—Two-year-old plants.

	\$1.00	\$2.25	\$ 8.00
9-12 inch			
12-18 inch	1.50	3.00	11.00
18-24 inch	2.00	4.00	15.00

CARAGANA—(See Seedlings, page 25.)

HONEYSUCKLE—Makes a good tall hedge.

	Per 10	Per 25	Per 100
12-18 inch	\$1.75	\$3.50	\$13.00
18-24 inch	2.00	4.00	15.00

SPIREA VANHOUTTE (Bridal Wreath)—Makes a nice hedge when trimmed.

	\$ 1.75	\$3.50	\$13.00
12-18 inch

HONEYSUCKLE VINE

CLEMATIS PANICULATA (Sweet scented Clematis)—Small fragrant white flowers freely produced in autumn.
2 year.....\$0.60 2 year heavy.....\$0.75
Large Flowering Clematis should be grown on trellises.

CLEMATIS HENRYI—Large white flowers.
2 year.....\$0.75 2 year heavy.....\$0.85

CLEMATIS JACKMANI—Large purple flowers.
2 year.....\$0.75 2 year heavy.....\$0.85

CLEMATIS MME. ED. ANDRE—Large red flowers.
2 year.....\$0.75 2 year heavy.....\$0.85

CLEMATIS RAMONA—Large light blue flowers.
2 year.....\$0.75 2 year heavy.....\$0.85

BIGNONIA RADICANS (Trumpet Vine)—A strong growing, hardy vine, good for pillars and fences. Large trumpet-shaped flowers, loved by humming birds.
2 year old.....\$0.45 3 year old.....\$0.60

CELASTRUS SCANDENS (Bittersweet)—A native twining vine. Large clusters of berries in fall, with orange husks and bright red berries.
2 year old.....\$0.45 3 year old.....\$0.60

AMPELOPSIS VEITCHII (Boston Ivy)—A graceful vine that clings tightly to stone or brick walls. Does best on the east or north. Glossy, three-lobed leaves.
2 year old.....\$0.60 3 year old.....\$0.75

AMPELOPSIS ENGELMANI (Engelman's Creeper)—A vigorous growing, clinging vine. Very hardy. Brilliant fall coloring.
2 year old.....\$0.45 3 year old.....\$0.60

AMPELOPSIS QUINQUE FOLIA (Virginia Creeper)—A splendid vine for trellises and arbors. Foliage changes to rich tints of crimson in the fall.
2 year old.....\$0.45 3 year old.....\$0.60

WISTARIA AMERICAN (Frutescens)—Long clusters of lilac purple flowers in June and July. Much used on arbors and trellises.
2 year old.....\$0.45 3 year old.....\$0.60

HONEYSUCKLE HALLEANA—White blossoms fading to a deep yellow, produced in profusion over a long blooming season. Very fragrant.

2 year.....\$0.35 3 year.....\$0.50

HONEYSUCKLE, Lonicera (Gold Flame)—Everblooming honeysuckle, blooming from early summer until killing frost. Showy, tubular flowers with recurving petals, flame red outside, bright yellow inside. Very fragrant and hardy.

2 year.....\$0.85

HECKROTTI—Everblooming trumpet-shaped flowers. Fragrant, bright red outside, yellow inside. Hardy.

2 year.....\$0.85

HONEYSUCKLE SEMPERVIRENS (Scarlet Trumpet)—Foliage of deep, bluish green. Flowers are scarlet, freely produced.

2 year.....\$0.45

SILVER LACE VINE

POLYGONUM AUBERTI (China Fleecevine or Lace Vine)—Large feathery sprays of creamy white flowers produced in late summer and fall. Rapid grower.

2 year.....\$0.60 3 year.....\$0.75

We Solicit Your Inquiries for Varieties Not Listed.

Plumfield SHADE

Plumfield shade and ornamental trees are first-class, well shaped, young and vigorous. Grown in soil that specially develops fibrous roots, which insures good results. All grades are based on standardized grades, where caliper and height are both important.

CUTLEAF WEEPING WHITE BIRCH

BIRCH, CUT LEAF WEEPING—A tall white-barked tree with gracefully drooping branches. Leaves deeply cut.

5-6 ft.	\$2.50
6-8 ft.	3.50
8-10 ft.	5.00
10-12 ft.	7.00

BIRCH, COMMON WHITE—Upright grower. Bark very white in mature trees.

6-8 ft.	\$2.00
8-10 ft.	2.75

ASH, AMERICAN GREEN—Tall growing tree. Foliage dark green, changing to gorgeous shades of purple and yellow in fall.

5-6 ft.	\$1.00
6-8 ft.	1.40
8-10 ft.	2.00

MOLINE ELM

The Moline Elm is a budded tree and is recommended for street and yard plantings where uniform trees are desired. Habit of growth is pyramidal. Very attractive large, waxy green leaves.

5-6 ft.	\$1.25
6-8 ft.	1.75
8-10 ft.	2.25
10-12 ft.	3.00

AMERICAN ELM

ELM, AMERICAN WHITE—The grandest of all trees for this region. Tall wide-spreading tops.

5-6 ft.	\$1.00
6-8 ft.	1.40
8-10 ft.	2.00
10-12 ft.	2.50

ELM, CHINESE—A rapid growing tree with slender branches covered with dark green foliage. Does well in dry territory. Prices listed here are for transplanted trees.

4-5 ft.	\$0.50
5-6 ft.75
6-8 ft.	1.00
8-10 ft.	1.40
10-12 ft.	1.75
2 in. caliper.....	4.00

ELM, VASE—A budded form of Elm, with graceful vase shape. Good for landscape and street planting.

5-6 ft.	\$1.25
6-8 ft.	1.75
8-10 ft.	2.25
10-12 ft.	3.00

REDMOND LINDEN

HACKBERRY

HACKBERRY—Grows into a large tree, with luxuriant foliage. Limbs are seldom broken by wind.

5-6 ft.	\$1.00
6-8 ft.	1.40
8-10 ft.	2.00
10-12 ft.	2.75

LINDEN, AMERICAN (Basswood)—A tree of beautiful form and size, good for street or lawn planting. Fragrant, yellow flowers affording nectar for bees

5-6 ft.	\$1.25
6-8 ft.	1.75
8-10 ft.	2.50
10-12 ft.	3.25

REDMOND LINDEN, Grafted tree, Crimean Basswood—Has an exceptionally straight trunk with branches growing close together on the trunk, making it very compact. Is a beautiful lawn or street tree.

5-6 ft.	\$1.50
6-8 ft.	2.00
8-10 ft.	2.75
10-12 ft.	4.00

We Invite You to Visit Our
Nurseries and Sales Grounds.

TREES Fremont, Nebraska

Grown in nursery rows, root pruned, transplanted and spaced to insure best root system and specimen trees.

Where caliper grades are shown, as 1 inch, 2 inch, 3 inch, etc., it means the diameter six inches above the ground.

PIN OAK

DECIDUOUS TREE WINDBREAKS

You will find varieties and prices listed on page 25.

LOCUST, THORNLESS HONEY—Same as Honey Locust but thornless. Makes a very good street or shade tree.

5-6 ft.	\$1.25
6-8 ft.	1.75
8-10 ft.	2.25

MAPLE, NORWAY—A round topped tree of beautiful appearance. Foliage of deep, rich green.

6-8 ft.	\$2.50
8-10 ft.	3.50

MAPLE, SCHWEDLER (Schwedleri) (Purple Leaf Maple)—40-50 ft. A perfectly shaped tree. Gleaming red and purple in spring. Purplish-green in mid-summer and in autumn golden yellow.

6-8 ft.	\$4.00
8-10 ft.	5.50

MAPLE, SILVER (Soft Maple)—The fastest growing and largest of the maples. Leaves are silver underneath.

5-6 ft.	\$1.00
6-8 ft.	1.25
8-10 ft.	1.75
10-12 ft.	2.25

MAPLE, SUGAR (Hard Maple)—Tall stately trees of great beauty. Foliage turns to brilliant shades of yellow orange and scarlet in autumn.

6-8 ft.	\$2.50
8-10 ft.	3.50

OAK, BUR (Quercus Macrocarpa)—Well known in Nebraska and Iowa. A very hardy rugged tree.

5-6 ft.	\$1.75
6-8 ft.	2.50
8-10 ft.	3.50

ENGLISH OAK—60-80 ft. tall. Forms a rounded head with dark green shiny leaves. Bears acorns while quite young.

5-6 ft.	\$2.25
6-8 ft.	3.00
8-10 ft.	4.00

OAK, PIN—Tall, pyramidal shape. Foliage glossy green, becoming brilliantly colored in autumn.

5-6 ft.	\$2.00
6-8 ft.	2.50
8-10 ft.	3.50

OAK, RED (Quercus rubra.) 60-80 ft.—An excellent tree for park and street planting. Beautiful foliage turning red in autumn.

5-6 ft.	\$2.00
6-8 ft.	2.75
8-10 ft.	3.50

WHITE OAK—60 to 80 ft. tall. Most highly prized of all the North American Oaks. With its sturdy and spreading form and beautiful autumn tints makes it a very valuable oak.

5-6 ft.	\$2.00
6-8 ft.	2.75
8-10 ft.	3.50

YELLOW OAK (Chestnut Oak)—40 to 50 ft. tall. Shiny green leaves resembling chestnut leaf.

5-6 ft.	\$2.25
6-8 ft.	3.00
8-10 ft.	4.00

RUSSIAN OLIVE—Attractive, silvery gray leaves and grayish-white berries. Used frequently for hedges and windbreaks.

5-6 ft.	\$1.00
6-8 ft.	1.25
8-10 ft.	1.50

SYCAMORE, AMERICAN—One of the tallest of our native trees. Very shapely, much admired because of its white spotted bark.

5-6 ft.	\$1.25
6-8 ft.	1.75

WILD BLACK CHERRY (Serotina)—40-50 ft. A native of the Middle West. White flowers in May followed by small black cherries borne in clusters.

8-10 ft.	\$1.50
10-12 ft.	2.00

BLACK WALNUT—A valuable tree for wood, lumber and nuts.

6-8 ft.	\$1.75
8-10 ft.	2.50

LOMBARDY POPLAR

POPLAR, LOMBARDY (2 Year)—A tall, pyramidal tree, limbs from the ground up. Fine for screens, and does not seed.

5-6 ft.	\$0.60
6-8 ft.75
8-10 ft.	1.00
10-12 ft.	1.35

POPLAR, YELLOW COTTONWOOD—A fast growing tree, and very hardy. Useful for windbreaks and shelter belts. Excellent lumber tree.

5-6 ft.	\$0.60
6-8 ft.75
8-10 ft.	1.00

POPLAR, BOLLEANA—A rapid growing columnar tree with silvery foliage. Pale green bark. Grows similar to Lombardy Poplar.

6-8 ft.	\$1.50
8-10 ft.	2.00

NIOBE WEeping WILLOW

WILLOW, NIOBE WEeping—Bark on twigs and branches of a golden yellow color, giving the tree a handsome appearance both winter and summer.

4-5 ft.	\$0.75
5-6 ft.	1.00
6-8 ft.	1.50
8-10 ft.	2.00

WILLOW, PUSSY—Small tree, with catkins on the branches in early spring.

18-24 in.	\$0.45
2-3 ft.60
3-4 ft.75

Plumfield Ornamental Flowering Trees

REDVEIN CRAB (Niedzwetzkyana). 20 ft.—A large growing Russian Turkestan variety. Has remarkable large red flowers in April followed by large purplish red fruit and leaves.

3-4 ft.	\$1.25
4-5 ft.	1.50
5-6 ft.	1.75

CRAB, BECHTEL'S DOUBLE FLOWERING—Profuse bloomer. Flowers very double, dainty pink and exceedingly fragrant.

18-24 in.	\$1.00
2-3 ft.	1.25
3-4 ft.	1.50

CRAB, HOPA (Red Flowering)—An upright growing tree with beautiful foliage. Loaded with rose-colored flowers in April. Fruit is red inside and out, and hangs on until late autumn. Hardy and free from disease.

3-4 ft.	\$1.00
4-5 ft.	1.25
5-6 ft.	1.50
6-8 ft.	1.75

FLORIBUNDA PURPUREA (Purple Crab) 25-30 ft.—Attractive red foliage in spring; single crimson flowers.

3-4 ft.	\$1.25
4-5 ft.	1.50

RED SILVER. 18-20 ft.—Fruit rich maroon red, foliage somewhat cut-leaved with silver and red color. A remarkable combination.

3-4 ft.	\$1.25
4-5 ft.	1.50

PRUNUS TRILOBA

BUCKEYE, COMMON—A tree that has long, slim, smooth leaves and greenish-yellow flowers followed by prickly burs that contain the buckeye in the fall.

4-5 ft.	\$1.75
5-6 ft.	2.25
6-8 ft.	3.00

PRUNUS, CISTENA (Hansen's Purple Leaved Plum)—Dwarf grower, with rich purple-red foliage. Pink flowers and purple fruit.

18-24 in.	\$0.75
2-3 ft.	1.00
3-4 ft.	1.25

PRUNUS, MINNESOTA PURPLE—A hardy purple leaved tree. Its rich, purplish-red foliage makes it a desirable tree. We grow it in bush form. Pink flowers and purple fruit.

18-24 in.	\$0.75
2-3 ft.	1.00
3-4 ft.	1.25

PRUNUS TRILOBA (Flowering Plum)—A profusion of handsome, double pink flowers. Vigorous shrub or small tree.

2-3 ft.	\$1.00
3-4 ft.	1.25
4-5 ft.	1.50

PRUNUS, NEWPORT (Purple Leaved)—Hardy, upright grower. Foliage reddish purple with bright red tips. Pink flowers and purple fruit.

2-3 ft.	\$1.00
3-4 ft.	1.25
4-5 ft.	1.50

RED BUD—Small native tree. Pinkish red flowers appear in spring before the leaves.

2-3 ft.	\$0.85
3-4 ft.	1.25
4-5 ft.	1.65

HOW TO PLANT

In planting in yard, garden, or field, the ground should be well prepared, and stock should be handled with least possible exposure. We offer the following suggestions on some of the more important plants.

How to Plant Roses

How to Plant Balled Evergreens

Wrong Way

Right Way

To determine the number of plants required per acre for any distance multiply the two plant distances and divide the product into 43,560 (the number of square feet per acre).

PLANTING DISTANCE OF FRUIT TREES

	Usual recommended distance	Best average distance	Number Per acre at average distance		Usual recommended distance	Best average distance	Number Per acre at average distance
Apple	25 to 32 feet	30x30 feet	48	Blackberry	1½ to 3x7 feet	2x7 feet	3110
Plum and Apricots	16 to 22 feet	20x20 feet	108	Gooseberry	4x6 feet	4x6 feet	1815
Pear	22 to 30 feet	25x25 feet	69	Currant	4x6 feet	4x6 feet	1815
Cherries and Peaches	12 to 16 feet	14x14 feet	147	Grape	8x8 feet	8x6 feet	680
Raspberry—(Hill)	4x6 or 5x5 feet	4x 6 feet	1815	Strawberry—			
(Hedge)	1½x3 by 6 to 7 feet	2x 6 feet	3630	Everbearing	15 to 18 in. x 3 to 4 ft.	1½x3 feet	9680
				June bearing	18 to 24 in. x 4 ft.	2x4 feet	5445

FOREST TREE SEEDLINGS . . .

for Woodlot and Windbreak Plantings

You will be doing a patriotic duty if you will plant trees of the right kind for protection against windstorms, for quick fence posts, for fuel, lumber and wild life coverage. We recommend Chinese Elm backed up with Cedar or Pine for quick and lasting windbreak. Many other varieties are as good or better, but not as fast developing. **FOR QUICK FENCE POSTS** plant Black Locust. Other varieties are good, but not as fast. **FOR QUICK FUEL** plant Cottonwood and Maple. For better fuel plant Elm, Ash, Oaks, Honey Locust, Hackberry, etc. **FOR LUMBER** there are many varieties suitable, but Cottonwood is the fastest lumber if you select the type best suited for your locality. We have a special selected type that has proven to be outstanding. Elms are being made into lumber today right here in Nebraska. Do you know that Nebraska has nearly one thousand Sawmills and our timbers are diminishing rapidly?

Deciduous trees for windbreaks and timber lots, fence lines, lanes, etc. This kind of stock planted in rows on fence lines, and through cultivated field at intervals of 20 to 40 rods will pay greater dividends for the amount of money spent than any other improvement or operation that can be applied to cultivated fields.

Consult us for planting distances and varieties. Also ask your agricultural conservation committee about tree planting credits; it will pay you.

If sent by mail add 20c on less than \$2.00 orders. 10% on orders more than \$2.00. Otherwise we will ship best way, charges collect.

WINDBREAK PLANTING

Plumfield ROSES

**CRIMSON BABY
BABY ROSES**

2 year, heavy, selected plants, \$1.15 each; 3 for \$3.25; 12 for \$12.00. 2 year, standard plants, \$1.00 each; 3 for \$2.90; 12 for \$10.00.

BABY ROSES OR DWARF POLYANTHA

CATHERINE ZEIMET—Double, pure white. fragrant. Borne in large clusters.

CRIMSON BABY—Small, semi-double, light crimson. Dense clusters.

EDITH CAVELL—Brilliant scarlet, overlaid velvety crimson.

ELLEN PAULSEN—Rather large, fairly full flowers of bright rose-pink. Slightly fragrant.

GOLDEN SALMON SUPERIOR—Bright orange-salmon. Blooms continually. An improvement on Golden Salmon.

GRUSS AN AACHEN—White tinted carmine, full double flowers.

KAREN POULSEN—Large clusters of open scarlet blooms.

IDEAL—Dark scarlet, borne in profusion. Immense, compact bunches. Vigorous and blooms continuously.

How to Plant Roses

HYBRID PERPETUALS

2 year heavy selected plants, \$1.15 each; 3 for \$3.25; 12 for \$12.00. 2 year standard plants, \$1.00 each; 3 for \$2.90; 12 for \$10.00.

More hardy than most of the Tea Roses. Do not bloom continuously but will bloom satisfactorily.

AMERICAN BEAUTY—A very popular cerise-red variety.

FRAU KARL DRUSCHKI—Very popular, large, pure white.

GENERAL JACQUEMINOT (Gen. Jack)—Old favorite, dark red garden rose.

PAUL NEYRON—Large rose-pink flowers. Almost thornless.

PAUL'S SCARLET

CLIMBING ROSES

2 year select, \$1.00 each; 3 for \$2.90; 12 for \$10.00. 2 year standard, 75c each, 3 for \$2.40; 12 for \$8.00.

CLIMBING AMERICAN BEAUTY—Brilliant carmine-red.

CRIMSON RAMBLER—Deep crimson.

DOROTHY PERKINS—Shell pink.

DR. VAN VLEET—Pale pink buds and flowers borne on long, individual stems.

GARDENIA—Rich creamy yellow. Borne in small sprays.

Be sure to read our Planting Instructions, "How to Plant Your Roses." This is important if you expect to get a good survival.

How To Plant Your Roses

To obtain success in planting roses it is important that they are properly planted. The roots should be trimmed back some and the hole dug large enough so that roots will not be crowded. Place the plant in the hole so that the bud union above the roots is at least two inches below the level of the ground, then fill in around the roots with dirt and water in well. After the water has seeped away, cut each cane back to about four inches above the level of the ground and cover the plant over completely with a mound of earth. After about six inches of new growth has forced through the mound of earth you can hoe the mound away gradually.

PICTURE

ROSES are scarce this year and will be until after the war. Therefore we suggest that you place your order early as the supply will not take care of the demand. When our present supply is exhausted we will not be able to replenish and would appreciate your listing substitute varieties in the event we do not have all the varieties you desire. While our list of varieties is small in comparison to the many varieties offered on the market today, we feel certain what we do list will serve you best in this territory.

Plumfield's hardy 2-year-old field grown roses will bloom the same year they are planted.

	Each	Per 3	Per 12
2-year heavy selected plants.....	\$1.15	\$3.25	\$12.00
2-year standard plants	1.00	2.90	10.00
